PROJECTS:

Mini Goods Transportain Survey

- Conducted a survey among local drivers to collect data on mini goods transportation challenges and practices.
- Analyzed collected data using statistical methods to identify key trends, including transportation costs, route preferences, and operational inefficiencies.
- Visualized findings through graphs and charts to highlight significant insights and patterns.
- Proposed actionable recommendations to improve efficiency, such as optimized route planning and cost management strategies.
- Gained hands-on experience in data collection, analysis, and reporting for real-world transportation scenarios.
